

CLAIMS

1. A compound represented by the following formula (I):

wherein R represents a linear or branched alkyl group containing 1 to 30 carbon atoms, a linear or branched alkenyl group containing 2 to 30 carbon atoms, or a linear or branched alkynyl group containing 2 to 30 carbon atoms, wherein these groups may comprise a cycloalkane ring or aromatic ring; and M represents a hydrogen atom or counter cation.

2. The compound according to claim 1 wherein, in the formula (I), R is $-\text{C}_{15}\text{H}_{31}$, $-(\text{CH}_2)_7\text{CH}=\text{CHC}_6\text{H}_{13}$, or $-(\text{CH}_2)_7\text{CH}=\text{CHC}_8\text{H}_{17}$.

3. A compound represented by the following formula (II):

wherein R represents a linear or branched alkyl group containing 1 to 30 carbon atoms, a linear or branched alkenyl group containing 2 to 30 carbon atoms, or a linear or branched alkynyl group containing 2 to 30 carbon atoms, wherein these groups may comprise a cycloalkane ring or aromatic ring.

4. A compound represented by the following formula (III):

5. A compound represented by the following formula (IV):

6. A medicament comprising, as an active ingredient, a compound represented by the following formula (I):

wherein R represents a linear or branched alkyl group containing 1 to 30 carbon atoms, a linear or branched alkenyl group containing 2 to 30 carbon atoms, or a linear or branched alkynyl group containing 2 to 30 carbon atoms, wherein these groups may comprise a cycloalkane ring or aromatic ring; and M represents a hydrogen atom or counter cation.

7. The medicament according to claim 6 which is used as an anticancer agent.
8. The medicament according to claim 7 which suppresses cancer cell invasion, so as to suppress metastasis of the cancer.
